![Infirmary Physician Alliance — INFIRMARY HEALTH — Physician Collaboration. Physician Leadership. Quality Care.]
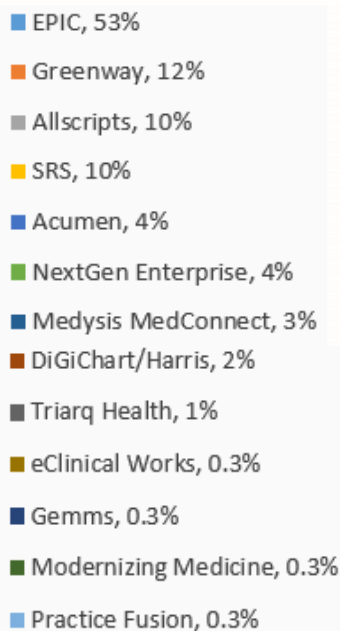

Physician to Physician
## Collaboration. Leadership. Quality.
Edition 2 • April/May/June 19

Clinical Integration

The Infirmary Physician Alliance (IPA) is a physician-led, physician-driven, and physician-governed organization that is aligned with Infirmary Health to provide physicians with a more integrated role in strategic planning, patient care and quality program implementation, and managed care contracting with payers/employers. The Infirmary Physician Alliance's main goal is to improve clinical quality and the care efficiency necessary to demonstrate value to payers/employers and patients.

IPA EHR's By Provider
(Does not include IPA Members without Clinic EHR)

- EPIC, 53%
- Greenway, 12%
- Allscripts, 10%
- SRS, 10%
- Acumen, 4%
- NextGen Enterprise, 4%
- Medysis MedConnect, 3%
- DiGiChart/Harris, 2%
- Triarq Health, 1%
- eClinical Works, 0.3%
- Gemms, 0.3%
- Modernizing Medicine, 0.3%
- Practice Fusion, 0.3%

IPA Clinical IT/Patient Health Record Committee Members

Dr. Ralph Buckley
Dr. Matthew Eves
Dr. Russell Goode
Dr. Michael Granberry
Dr. Ankit Gulati
Dr. Charles Kirkland
Dr. Sumana Kumarappa
Dr. Ryan Neil
Dr. Daren Scroggie
Dr. Andrew Smith
Dr. Shannon Stinson
Dr. Frank Wang
Dr. Wells Wilson
Dr. Furhan Yunus

The Infirmary Physician Alliance Clinical IT/Patient Health Record Committee is evaluating the IT infrastructure needs and developing a strategy to address these areas. This committee will also be responsible for monitoring data integration with physician practices and key partners for enhanced data sharing. As shown above, there are a significant number of different EHR's that make up the IPA. The Clinical IT/Patient Health Record Committee is working on solutions to allow these systems to share information.

Collaborative Care Network Kick Off

Infirmary Health Collaborative Care Network (CCN)

In March, Infirmary Health created the first Gulf Coast Collaborative Care Network that includes 63 post-acute care providers who commit to collaborate with Infirmary Health, IPA physicians, and with each other to improve quality, cost, and the experience of patients in our clinics and hospitals. CCN providers include 24 skilled nursing facilities, 24 home health agencies, and 15 hospice agencies. A full list of CCN providers will be highlighted in the June newsletter. The goal of the CCN is to:

- Improve patient outcomes
- Enhance patient experience
- Drive operational efficiencies for population health
- Succeed under innovative payment models that are impacted by post-acute care (VBP, BPCI, ACO)

For more information about the CCN participants please email Ryan Summerford at Ryan.Summerford@InfirmaryHealth.org.

Primary Care Physician Meeting

The Infirmary Physician Alliance held the initial Primary Care Physician Meeting in March with over 60 primary care physicians in attendance. The meeting was extremely interactive including questions from many physician memebrs. The meeting was chaired by Dr. Jason Valentine and Dr. Frank Wang. Below is the agenda for the meeting.

    I.   Infirmary Physician Alliance Update
    II.   Payer Contracting Strategy
    III.   2019 IPA Payer Agreement Presentations
        a.   VIVA
        b.   Secure Horizons
        c.   Blue Advantage
    IV.   Steps to Achieve Quality Bonus Programs
    V.   Infirmary Health Update

The following quality metrics will be discussed in each of the IPA Clinical Programs Committees upcoming meetings in May and June.

Infirmary Physician Alliance Quality Metric Triggers
(Required to "trigger" the quarterly shared savings bonus programs)

VIVA Health	
1	Physician's panel open to new members
2	65% CRF completion on panel members
3	C4Q nurse access to physician's office
4	65% C4Q measure completion

Secure Horizons	
Eligibility Criteria	
Eligibility Criteria Requirement	Compliance % Target
Screening	
HbA1c Screening - Diabetic	80%
Nephropathy Screening - Diabetic	85%
BMP/CMP/Renal Panel - CHF or Renal	65%
Service	
Annual Comprehensive PCP Visit	75%

Blue Advantage			
Performance	Exceeds	Target	Acceptable
Controlling High Blood Pressure Star IDC16	>= 86%	>= 83%	>= 80%
Diabetes HbA1c Control Star IDC15	>= 90%	>= 88%	>= 86%
Statin Use in Diabetic Patients Star IDD14	>= 84%	>= 82%	>= 80%
Medication Adherence for Diabetes Star IDD10	>= 85%	>= 83%	>= 81%
Medication Adherence Hypertension Star IDD11	>= 90%	>= 88%	>= 86%
Medication Adherence Cholesterol Star IDD12	>= 87%	>= 85%	>= 83%
